

Appendix 1

Proposed Vision and Goals

Proposed Public Transport Vision and Goals

Details:

- Public transport contributes to **reductions in carbon emissions**, both from a low-emission fleet and mode shift.
- Ensuring our public transport system is **resilient to climate change**, including disruption from weather events
- **Enhancing the environment** with the infrastructure we build to support public transport

Details:

- Covers all our services; **bus, train, ferry**, and also the **customer support and information** services,
- Ensuring our services provide customers **an attractive travel option**
- Providing services that are **resilient and responsive to changes in demand**

Details:

- Public transport helps to **reduce inequity**, by enabling people to access social, economic, and cultural opportunities
- Ensuring public transport is **affordable and safe** for people of all ages, abilities, and identities
- Providing iwi and whanau Māori with **transport choices that support access to cultural sites** (such as marae and wahi tapū)

Details:

- **Collaborating with operators and private providers** to improve our services to customers.
- Working with our partners,, stakeholders and communities to **ensure value for money** across our public transport system.
- **Advocating for additional funding** to support our aspirations for improvements.

Details:

- Providing quality walking and cycling **connections to public transport**.
- Working with Council and developers to **support more housing near public transport**.
