# Lagoon Drive

## *Lagoon Drive changes:*

- Widened on the cliff side of the road to allow for the busway, a wide shared cycle and footpath, as well as a median between the busway and general traffic
- General traffic lanes reduced to one in each direction, made possible by the new Panmure intersection improving traffic flows
- The southern side of Lagoon Drive remains untouched to avoid significant geological and archaeological features
- Signalised intersections with bus stops at Basin View Lane and Church Crescent
- Some properties on Lagoon Dr need to be purchased to allow for busway, others will have changes to access as vehicles can't cross the busway.
